About

Velox is a pioneer of the Indian IT Infra Monitoring and Cyber Security domain. We develop Information Technology Security Solutions and have been in the industry throughout the last decade. Velox has a range of world-class products that meet International Standards in terms of quality and delivery. We offer our solutions to many industries, such as the BFSI sector, Health Care, Manufacturing, and Industrial Automation Systems sector, just to name a few.

With Velox's subsidiary in the United States of America, presence in 7 countries and 3 continents and counting, and the inclusion of our adoption of international standards and regulation, with ISO 9001:2015, 20000 & 27000 and PA-DSS global certifications for our operations, Velox is set for global domination.

Milestones

2019-2020: Asian-African Chambers of Commerce Award-Excellence in Innovation & Technology

2018-2019: CIO Tech - Top 20 Most Promising Cyber Security Solutions Provider

2018-2019: Business Connect Magazine - The Company of the Year

2017-2018: CTO Forum - Best Service Provider in India

2016-2017: Listed in CIO Magazine as India's Top 20 Most Promising Business Intelligence Solution Provider

SecureIT[®]

Endpoint Detection and Response

SecureIT-Endpoint Detection and Response (EDR), is a Cyber Security solution, that continuously monitors and responds to mitigate cyber threats. Our solution's primary focus is on detecting and investigating suspicious activities and traces of such other vulnerabilities on your hosts/endpoints.

SecureIT[®]

Endpoint Detection and Response | Functions

- SecureIT-Endpoint Detection and Response solution works by monitoring endpoints, network events, and recording the information in a central database.
- Further steps involving the analysis, detection, investigation, reporting, and alerting also takes place.

- A client software agent, installed on the host system provides the foundation for event monitoring and reporting.
- Our solution facilitates continuous monitoring and detection through the use of analytical tools. These tools identify tasks that can improve a company's overall state of security by identifying, responding to, and deflecting both internal and external threats.

SecureIT[®]

Endpoint Detection and Response | Features

- **Filtering:** Our solution is capable of filtering out false positives.
- **Advanced Threat Blocking:** Our solution identifies the persistent attacks and blocks them, to ensure that impact of the threat is minimized/ negated.
- **Incident Response Capabilities:** Our solution has the capability of Threat Hunting and Incident Response, which can help prevent full-blown data breaches.

- **Multiple Threat Protection:** Our solution is prepared to handle multiple types of threats at the same time such as ransomware, malware, trojan, and many more.
- **DLP:** our SecureIT solution, has inbuilt Data Loss/Leak Prevention (DLP) feature.
 - External USB/ External Device Restriction
 - Clipboard Monitoring/ Clipboard Restriction
 - Share Folder Monitoring Details
 - Print Screen Monitoring
 - Non-Working Hours Policy
 - Drive Monitoring
 - Autorun USB Prevention
 - Website Monitoring/Restriction
 - URL/USB Whitelisting
 - Capture Pen drive Copy Details
 - Printer & Email Monitoring
 - Device Up and Down
 - Remote Desktop Access Monitoring & Reporting
 - Windows Event Policy
 - Computer Events
 - Suspicious User Login Monitoring
 - Whitelist Users
 - Patch Upgrade Status

SecureIT[®]

Endpoint Detection and Response | Benefits

- The system avoids unnecessary clogging of logs, which further leads to optimal usage of storage.
- The system prevents tentative damage to data/set-up, by preventing persistent attacks, by enabling data security.
- Incident Response Capabilities help the users, to be proactive in managing the security of the endpoints meticulously. Also, ensures preventive actions for any such future vulnerabilities.
- By protecting the environment from multiple threats, our solution proactively ensures comprehensive protection.
- DLP feature helps the system administrator to
- monitor the activities in the End Points, from the central console
