About

Velox is a pioneer of the Indian IT Infra Monitoring and Cyber Security domain. We develop Information Technology Security Solutions and have been in the industry throughout the last decade. Velox has a range of world-class products that meet International Standards in terms of quality and delivery. We offer our solutions to many industries, such as the BFSI sector, Health Care, Manufacturing, and Industrial Automation Systems sector, just to name a few.

With Velox's subsidiary in the United States of America, presence in 7 countries and 3 continents and counting, and the inclusion of our adoption of international standards and regulation, with ISO 9001:2015, 20000 & 27000 and PA-DSS global certifications for our operations, Velox is set for global domination.

Milestones

2019-2020: Asian-African Chambers of Commerce Award-Excellence in Innovation & Technology

2018-2019: CIO Tech - Top 20 Most Promising Cyber Security Solutions Provider

2018-2019: Business Connect Magazine - The Company of the Year

2017–2018: CTO Forum - Best Service Provider in India

2016-2017: Listed in CIO Magazine as India's Top 20 Most Promising Business Intelligence Solution Provider

SecureIT® EPSM (Agentless) Overview

Our agentless solution platforms are built on an entirely different architecture that supports a very different approach to managing security for a virtualized environment. Instead of installing a copy of the security software on each VM, a separate virtual appliance is configured to be fully dedicated to the task of running security software and managing security threats. Our solution centralizes all operations and coordinates VM security tasks.

It's unlikely—even in large environments—that multiple security program instances will attempt to perform full disk scans simultaneously. Also, management resources are much simpler. Yet they exhibit much higher performance since it's unnecessary to individually or manually update the security software of each VM. With our agentless solution, you can centralize and automate such tasks.

SecureIT® EPSM (Agentless) Overview

Our Agentless solutions monitor the entire VM environment around, around the clock. Always-on security is especially important during add-on activities—when you add new endpoints to a host. Each new endpoint will get immediate coverage from the centralized security appliance, which essentially eliminates any security gaps.

Deployment of agentless antivirus/anti-malware on virtualized environments helps to significantly reduce costs while increasing performance and improving security for the environment. This is why top-tier cloud computing service providers all employ agentless security solutions for their virtualized environments.

SecureIT® EPSM (Agentless) Features

- Hardware Monitoring

  - System Information

    - Host Name

    - Mac address

    - Serial No

  - Computers System

    - System Manufacturer

    - System model

    - System domain

  - OS Information

    - OS Name

    - OS Version

    - Product ID

    - Service Pack

    - OS Type

    - Build Number

  - Memory

    - Physical Memory

    - Virtual Memory

SecureIT® EPSM (Agentless) Features

- BIOS
    - BIOS version size
    - BIOS Release Date
    - BIOS Name
    - BIOS Manufacture
- Processor
    - Process Name
    - Process Manufacturer
    - No of cores
- Install Memory Modules
    - Socket
    - Capacity
    - Module Tag
    - Bank label
    - Serial number
    - Frequency
- Hard Disk
    - Hard Disk Name & Model
    - Serial Number & Media Type
    - Interface type
    - Manufacturer & Capacity

VELOX®

SecureIT® EPSM (Agentless) Features

- Autorun (On/ Off)

- Run Command (Add Activity Command)

- Services Monitoring

- Computer Events (Shut Down & Restart)

- Device Status

- Antivirus

- Outside Our Policy

- Health Monitoring

  - CPU

  - Memory

  - Drive

  - Uptime

- Shared Folder Monitoring

  - Shared folder list of end points

  - Unshare particular shared folder of end points

  - Create a shared folder on end points

  - Give ready only write permission to a shared folder

SecureIT® EPSM (Agentless) Benefits

- Centralized file scanning
  - This results in a major performance improvement because it moves essential yet resource-intensive security functions to the central security appliance
- Lower operational overhead
  - Provides robust security that is much easier to manage.
- Native integration
  - High degree of automation and better protection for data.
- Security policy consolidation
  - Enables you to consolidate all security settings—attack-blocking, network, anti-virus, anti-malware—into a single, cohesive policy.
- Exhaustive infrastructure scan
- Reduction in computing resource demands
- Considerably easier security management
- Always-on protection
