# Network Monitoring Solution

**One Point Solution for Monitoring your Entire IT Networks**. Network Monitoring System (NMS) is a part of our SecureIT suite which focuses on monitoring and securing an organization's network devices. SecureIT- NMS is commonly known for its advanced infrastructure management capabilities. All Devices, Systems, Traffic, and Applications in the network can be easily displayed in a hierarchical view that summarizes performance and alerts.

Visualizing your entire IT infrastructure with further classifications based on type or logical groups. With NMS you can monitor, control, deploy and allocate any type of data that are supposed to be transmitted to different units/systems in a network.

Automatic configuration of devices and interfaces with predefined templates. We can also Implement advanced network performance monitoring techniques to quickly resolve network faults by doing Root cause analysis. Get advanced reporting features with the provision to schedule and automatically email or publish the reports.

SecureIT Solution Delivering End-to-End Unified Network Monitoring System.

# Network Monitoring Solution

SecureIT Network Monitoring Solution (Infrastructure Intelligence Platform - IIP) proactively monitors & optimizes all network devices, servers, and applications across IT infrastructure to manage the network for fault and performance for maximum uptime.

The platform collects, discovers, and indexes data from multiple sources including databases, web servers, containers, virtualizations, URLs, cloud services, middleware, and much more.

Our Solution is built for every member of the IT team to monitor, track, and deliver uninterrupted business service.

It also enables its users to search, visualize & analyze the data on various critical metrics with the help of customizable dashboards and widgets to extract powerful operational intelligence.

SecureIT uses a unique data model to cut through data floods and quickly detect what matters the most to run IT more effectively.
