

CYBERSECURITY INNOVATIONS POWERED BY AI

# SecureIT<sup>®</sup>

## DLP

SecureIT DLP is a unified data protection solution designed to prevent sensitive data loss, misuse, and unauthorized access across the enterprise.

### THE CHALLENGE

Enterprises face a threat landscape that legacy tools were not built for

- **Lack of data visibility** – Organizations struggle to understand where sensitive data resides, how it moves, and who is accessing it, leading to blind spots in security and increased risk of undetected leaks.
- **Uncontrolled endpoint data leakage** – Most data breaches originate at the endpoint, where users can easily transfer data via USB devices, copy-paste (clipboard), screenshots, printing, or unauthorized applications without adequate control.
- **Fragmented security architecture** – Traditional environments rely on multiple tools for endpoint, network, email, and cloud security, resulting in inconsistent policies, integration challenges, and gaps that attackers or insiders can exploit.
- **Delayed or ineffective policy enforcement** – Many DLP solutions focus on detection rather than prevention, causing delays in action and allowing sensitive data to be exposed before security teams can respond.
- **High cost and operational complexity** – Legacy DLP platforms require multiple modules, skilled resources, and ongoing tuning, making them expensive to deploy, difficult to manage, and slow to deliver real security value.

# 100%

Visibility across endpoints, email & web

# 95%

Sensitive data classification accuracy across structured & unstructured data

# 50+

Pre-built compliance templates

### KEY BENEFITS

- ✓ End-to-end data protection (data at rest, in motion, in use)
- ✓ Prevents data leaks across USB, email, web, and endpoints
- ✓ Deep endpoint control (USB, clipboard, screenshots, applications)
- ✓ Real-time policy enforcement (block, allow, encrypt, alert)
- ✓ Built-in full disk encryption (no add-ons required)
- ✓ Single-agent, unified platform
- ✓ Faster deployment and quick time to value
- ✓ Lower total cost of ownership (TCO)
- ✓ Strong compliance and audit readiness
- ✓ Complete visibility of data movement and user activity

## KEY CAPABILITIES

# One Unified Agent

### 01 Prevent Data Loss Across All Channels

- › Protect sensitive data across endpoints, networks, email, and the cloud
- › Secure data at rest, in motion, and in use from a single platform
- › Stop both accidental leaks and malicious exfiltration

### 02 Gain Complete Visibility of Data Movement

- › Monitor how data is accessed, used, and shared
- › Track activities across USB, email, web, and network shares
- › Identify risky behaviour in real time

### 03 Control Endpoint Data Leakage

- › Restrict USB devices (serial-level control)
- › Block clipboard copy, screenshots, and unauthorised transfers
- › Monitor print, file activity, and application usage

### 04 Secure Email & File Transfers

- › Scan email body and attachments (including password-protected files)
- › Prevent unauthorised sharing via email, FTP/SFTP, and web uploads

### 05 Detect Sensitive Data with Precision

- › Use content-aware inspection (keywords, regex, file type, context)
- › Accurately identify confidential and regulated data
- › Reduce false positives with granular policies

### 06 Enforce Real-Time Data Protection Policies

- › Take instant action: Block | Allow | Encrypt | Alert

### 07 Protect Data Even if Devices Are Lost

- › Built-in Full Hard Disk Encryption (FHDE)
- › Encrypt removable devices and control access
- › Ensure zero data exposure from stolen endpoints

### 08 Strengthen Compliance & Audit Readiness

- › Maintain logs for all user and data activities
- › Support regulatory compliance (RBI, SEBI, DPDP, etc.)
- › Integrate with SIEM / SOAR for centralised monitoring

## KEY CAPABILITIES

# One Unified Agent

### 09 Simplify Security Operations

- > Single-agent, unified platform (no multiple tools)
- > Faster deployment and easier management
- > Reduce operational overhead and complexity

### 10 Reduce Cost While Improving Security

- > Lower Total Cost of Ownership (TCO)
- > No need for additional modules (encryption, device control, etc.)
- > Faster ROI with minimal infrastructure

#### ADD-ON AVAILABLE

Need 24/7 coverage? Add Velox MDR.

- India-based SOC analysts, 24×7×365
- 15-minute SLA for critical incidents
- Seamless activation — no new agent required

[LEARN MORE →](#)

## ADDITIONAL FEATURES

### 01 Unified Data Protection Across All States

- > Protects data at rest, in motion, and in use from a single platform
- > Covers endpoint + network + email + cloud visibility
- > Eliminates the need for multiple DLP modules (unlike competitors)

### 02 True Content-Aware DLP Across Network Channels

- > Deep content inspection (regex, keyword, file type, context-based scanning)
- > Works across:
  - o Email
  - o FTP / SFTP
  - o Web
  - o Network shares
  - o External devices

### 03 Built-in Full Hard Disk Encryption (FHDE)

- > Native Full Disk Encryption integrated with DLP
- > Protects data even if the device is stolen

### 04 Deep Endpoint Visibility & Control

- > Clipboard monitoring & restriction
- > Screenshot/snipping control
- > Application whitelist/blacklist
- > USB device serial-level control

## ADDITIONAL FEATURES

### 05 Granular Network & Data Channel Control

- > Content-based control over:
  - o FTP / SFTP
  - o Network shared drives
  - o File transfers
- > SharePoint / shared folder auditing & unsharring

### 06 Advanced Email DLP with Attachment Intelligence

- > Scan:
  - o Email body
  - o Attachments
  - o Password-protected files
- > Policy-based blocking/alerting

### 07 Geo / Continent-Based Website Control

- > Detect and control access based on geographical region
- > Combine with URL filtering

### 08 Real-Time Enforcement with Granular Policies

- > Action options:
  - o Block
  - o Allow
  - o Encrypt
  - o Alert
- > Based on:
  - o User
  - o File type
  - o Application
  - o Content pattern

### 09 Integrated Device & Data Control (Single Agent)

- > USB control + encryption + copy tracking
- > External device copy monitoring & reporting
- > Autorun protection

### 10 Built-in Audit, Monitoring & SIEM Integration

- > Logs from:
  - o Windows / Linux
  - o Firewalls
  - o Databases
- > Native integration with:
  - o SIEM
  - o SOAR

### 11 Faster Deployment & Lower TCO

- > Available:
  - o On-prem
  - o Cloud
- > Single unified architecture

THINK CYBER SECURITY... THINK VELOX

Velox Solutions is a Global cybersecurity OEM delivering advanced, AI-powered technologies that strengthen Security Operations and enterprise resilience since 14+ years. Our solutions enable faster threat detection, automated response, and deep visibility across users, endpoints, and infrastructure. Leveraging AI-driven SIEM, SOAR, and behavioural analytics, Velox builds proactive, intelligence-led SOC environments, empowering government and enterprise sectors to stay ahead of evolving cyber threats.
