

CYBERSECURITY INNOVATIONS POWERED BY AI

AssetGrid[®]

ITAM

End-to-end intelligent asset lifecycle management with AI-driven automation, real-time visibility, and cost optimization across IT and non-IT ecosystems.

95%
Asset Visibility Accuracy

60%
Faster Audit Preparation

50%
Reduction in Manual Effort

THE CHALLENGE

Top 5 Industry Challenges (if ITAM is NOT implemented)

- **Lack of Asset Visibility** - Organizations operate with incomplete or outdated asset inventories, especially across hybrid IT environments. This leads to blind spots in security, compliance failures, and inefficient decision-making.
- **Uncontrolled IT Spending** - Without lifecycle tracking and usage insights, companies over-purchase hardware/software or miss renewal optimization. Result: 15–25% budget wastage due to unused or underutilized assets.
- **Compliance & Audit Failures** - Inability to track licenses, warranties, and contracts increases non-compliance risks (e.g., audits, RBI/SEBI). This can lead to heavy penalties, reputational damage, and audit failures.
- **High Operational Inefficiencies** - Manual asset tracking, approvals, and updates create delays and human errors. IT teams spend excessive time on reconciliation instead of strategic tasks.
- **Security Risks from Unknown Assets** - Untracked endpoints, shadow IT, and unmanaged devices become easy entry points for attackers. This significantly increases the attack surface and breach probability.

KEY BENEFITS

- ✓ **Complete Asset Visibility & Control**
Provides real-time discovery of IT and non-IT assets (IP & non-IP based).
- ✓ **Cost Optimization & Budget Efficiency**
Identifies unused assets, license misuse, and redundant purchases.
- ✓ **Automation-Driven Efficiency**
RPA, AI, and ML automate workflows, approvals, and CMDB updates.
- ✓ **Improved Compliance & Audit Readiness**
Tracks contracts, warranties, licenses, and lifecycle in a centralized system.
- ✓ **Enhanced Decision-Making (CXO Visibility)**
Provides dashboards, predictive analytics, and financial insights. Improves strategic planning and asset ROI by 15–25%.

KEY CAPABILITIES

One Unified Agent

01 Asset Discovery & Inventory Management

- › Agent-based & agentless discovery across network assets
- › IP-based asset tracking (auto-discovery via IP ranges)
- › Non-IP asset onboarding via bulk templates
- › Hardware & software inventory classification

02 Lifecycle & Asset Tracking

- › End-to-end asset lifecycle management (procurement → disposal)
- › Tracks IP, MAC ID, location, and ownership
- › Maintenance, depreciation, and disposal tracking

03 CMDB & Integration

- › Ticket-based CMDB auto-updates
- › Two-way integration with ITSM tools (real-time sync)
- › Asset relationship mapping (dependencies, peripherals)

04 Software Asset Management (SAM)

- › License tracking (standard + 3rd party apps)
- › Software usage analytics & optimization
- › Identification of unused or underutilized software

05 Financial & Contract Management

- › Tracks AMC, warranties, contracts, and insurance
- › Alerts for contract/renewal expiry
- › Asset cost allocation and financial governance

06 Workflow Automation

- › Automated approval matrix & notifications
- › AI/ML-driven predictive analysis
- › RPA-enabled process automation

07 User & Allocation Management

- › Asset-to-user mapping
- › Asset loan tracking and reassignment
- › Improved accountability and ownership tracking

08 Reporting & CXO Dashboards

- › Real-time dashboards for executives
- › Predictive insights (cost, risk, utilization)
- › Custom reporting for audits and compliance

ADD-ON AVAILABLE

Need 24/7 coverage? Add Velox MDR.

- India-based SOC analysts, 24x7x365
- 15-minute SLA for critical incidents
- Seamless activation — no new agent required

THINK CYBER SECURITY... THINK VELOX

Velox Solutions is a Global cybersecurity OEM delivering advanced, AI-powered technologies that strengthen Security Operations and enterprise resilience since 14+ years. Our solutions enable faster threat detection, automated response, and deep visibility across users, endpoints, and infrastructure. Leveraging AI-driven SIEM, SOAR, and behavioural analytics, Velox builds proactive, intelligence-led SOC environments, empowering government and enterprise sectors to stay ahead of evolving cyber threats.
